

# LAMKLEEN®

**Environmentally responsible detergent that effectively removes residual hydrocarbons**

- ▼ Non hazardous, ready to use blend of alkaline salts and biodegradable surfactants
- ▼ Excellent wetting agent capable of penetrating residual organic deposits
- ▼ Effective in flushing pipelines for abandonment, salvage, or maintenance; will not harm the environment if discharged into water
- ▼ Can be applied during flushing/pigging operations

## DIRECTIONS

- ▼ Use neat when removing residual crude oil in pipelines or production equipment.
- ▼ In a pipeline, inject the solution as a pill between pigs, and push at a slow rate to allow sufficient contact time.
- ▼ When used as a general degreaser, the product can be diluted up to 10:1. The soil load will determine the appropriate working concentration.
