

PIGRENEW™

Proprietary blended unitized material, water soluble product with surfactants and encapsulated oxygen

- ▼ Aggressive on paraffinic and asphaltenic deposits in reduced flow pipelines
- ▼ Increases water activity to penetrate very hard deposits in temperature ranging from 34°F to 190°F
- ▼ Will penetrate and remove deposits from pipe wall
- ▼ Will leave a micro-resistant film to help prevent accumulation of future deposits

PHYSICAL PROPERTIES

Appearance:	White unitized material
Odor:	Very low odor
pH of 1% Solution:	11-12
Water Solubility:	120g/l @ 25°C
Bulk Density:	67.6 lbs./ft ³

TRANSPORT INFORMATION

U.S. Department of Transportation (Road or Rail):	Not Regulated
Canadian T.D.G:	Not Regulated
Water Transportation (IMDG):	Not Regulated
Air Transportation (IATA):	Not Regulated

PACKAGING

PigRenew™ is available in 2", 4" & 6" units.
